

Cheryl L. Cejka
Battelle – Pacific Northwest Division

Cheryl Cejka leads technology commercialization activities for Battelle's Pacific Northwest Division.

In that role, she is responsible for intellectual property management, portfolio development and investment, as well as technology commercialization activities for the Division and on behalf of the Pacific Northwest National Laboratory operated by Battelle. Cheryl has held a broad range of business management and technology development positions with PNNL and in Battelle's corporate Core Technology investment group. Her areas of expertise include finance, contracts, business development, licensing, and commercialization.

Since accepting her current assignment in 2001, Cheryl has dramatically increased annual returns from intellectual assets at PNNL. She has led the creation of many significant technology licensing arrangements, including the establishment of several new business ventures.

Cheryl has been recognized for her achievements in the areas of new business development, organizational redesign, licensing, and commercialization and for leading the Economic Development and Technology Transfer component of Battelle's successful \$5B bid to operate the Oak Ridge National Laboratory (ORNL).

Cheryl received a bachelor's degree in business/marketing and an MBA in finance, both from the University of Washington. She is an active member of the Licensing Executives Society and the Association of University Technology Managers, and is a Fellow in the National Contracts Management Association. She serves on the Washington Economic Development Commission steering committee for technology commercialization.
