

Christine Ivie

NASA Ames Research Center

Christine Ivie is the Chief of Education at NASA Ames Research Center. Christine has worked to strengthen education programs in Science, Technology, Engineering and Math (STEM) fields and is committed to growing the pipeline of K-12 students who have a strong foundation in STEM and are ready to successfully enter the workforce in STEM fields. Prior to joining the NASA education team, Christine served as a Deputy Superintendent at the Idaho Department of Education and Chief Academic Officer for the Idaho Board of Education. In those roles, Christine worked to raise math and science requirements, develop initiatives to improve instruction in STEM areas and increase academic expectations for all students. Christine has worked as a principal, special education director, guidance counselor and teacher in the public school system and now enjoys utilizing NASA content and programs to inspire, engage, educate and employ students in support of NASA's mission.
