

John J. Rodenrys

Leading Ventures LLC

Mr. Rodenrys is CEO and Senior Managing Partner of Leading Ventures LLC, www.leadingventures.com, a seed round venture fund that provides capital, specialized expertise and network connections to early stage technologies that can be accelerated to a revenue generating entity, early outlicense or sale to an acquiring firm.

Previously, he was CEO of SafetyMate Corporation, the company that invented and distributes a portable life-saving responder device with American Red Cross and Homeland Security Protocols. Prior to joining SafetyMate, he was COO of ForHealth Technologies, where he was responsible for R&D, manufacturing, quality assurance, customer service and field operations. ForHealth develops and markets an FDA-regulated medical device that is the world's first fully automated robot for filling syringes for IV uses in hospitals. He previously served as president of Vistant Corporation, a subsidiary of Cardinal Health (NYSE:CAH), and a Fortune 50 Company.

Mr. Rodenrys holds a BS in engineering from Rensselaer Polytechnic Institute (RPI), a master's in business from U.S. International University (USIU) and an APICS CPIM (American Production & Inventory Control Society; Certified in Production & Inventory Management). He is the author of *Production and Management Systems for Business*, published by Prentice Hall and is a co-inventor on three patents.
