

Gary Wang

Space and Naval Warfare Systems Center, San Diego

As Director of Science, Technology and Engineering at Space and Naval Warfare Systems Center, San Diego (SSC SD), Gary Wang is responsible for providing leadership and key functional support critical to the laboratory's vision for the future, growth, and partnering with outside organizations. Mr. Wang directly influences approximately \$325 million of SSC SD projects associated with Science and Technology (S&T) funding. As the Chief Technology Officer, Mr. Wang is responsible for converting technology into Naval capabilities rapidly, affordably and efficiently. Additionally he oversees internal discretionary S&T programs and ensures a vital S&T workforce. From 1998 to 2004, he served Space and Naval Warfare Systems Command (SPAWAR) in several managerial positions. Wang received his Bachelor of Science degree in Electrical Engineering from the University of Texas at Austin in 1983.
